## Viewing

Super Inspector camera

## Air Whipping

Octopus whip

Tri & single whip

## Air Washing

Forward air nozzle

Reverse air nozzle

## ***Super RBS Rotary Brush & Air Washing System - the 12 headed cleaning monster!***

Do you want to maximize your cleaning quality, capability and productivity? Look no further than the patented Super RBS rotary brush system - the 12 headed cleaning monster!

Six different brushes lets you knock out accumulated dirt and debris in all types of ductwork from 4" to 30" high. Four whip heads and two air sweep nozzles give you unmatched air washing/whipping capability. The unique guide system lets you position the brush/whip/nozzle where you want. Plus, you can add the Super Inspector camera so you can better view and record the cleaning results.

## Features & Benefits

---

- Four brushes are included in the standard package (see below). They let you clean all types of ductwork from 4" to 20" high. The nylon brushes are soft enough to clean delicate surfaces like duct board and duct liner and are strong enough to clean sheet metal and other hard surfaces. The silica carbide media is designed for aggressive cleaning on sheet metal and other hard surfaces only.
  - The reversible air motor and variable speed control lets you effectively clean corners and delicate surfaces like duct board and duct liner. The air motor consumes up to 7 cfm of air.
  - The guide system lets you center the brush in the ductwork from 3" to 11" off the bottom in 1" increments so you can position the brush for maximum cleaning effectiveness.
  - Forward and reverse air washing tools attach quickly and easily to the extension rods so you can air wash after you brush.
  - The standard package also includes 5 extension rods that lets you clean 23' each way from one access opening. Plus, an on/off trigger control and pressure regulator that connects to your air hose from your compressor.
  - The "Big Brush Kit" lets you clean ductwork that is 20" to 30" high for even greater brushing capability.
  - The "Whip Kit" includes four different air whip assemblies that attach quickly and easily to the extension rods excellent air whip cleaning capability.
  - You can view the entire cleaning operation by adding the optional Super Inspector visual inspection system. This will further improve your cleaning productivity and quality!
  - No other cleaning tool gives you so much cleaning capability in one system! No other cleaning tool is the 12 headed cleaning monster!
