

Clean: 4" to 10" ductwork

Clean: 8" to 22" ductwork

Clean: 20" to 30" ductwork

New "Big Brush" Kit

***Clean 4" to 30" ductwork
with the Super RBS Rotary Brush
& Air Washing System!***

The patented Super RBS rotary brush system has proven to be an indispensable cleaning tool since 1993. The standard Super RBS system lets you clean ductwork from 4" to 22" high and the new "Big Brush" kit enables you to clean ductwork from 20" to 30" high. No other brushing system gives the different sizes and types of brushes, the unique adjustable guide system, the forward and reverse air washing attachments, and the ability to add the Super Inspector III camera to view your cleaning!

Features & Benefits

- Four brushes are included in the standard package (see below). The nylon brushes are soft enough to clean delicate surfaces like duct board and duct liner and strong enough to clean sheet metal and other hard surfaces. The silica carbide media is designed for aggressive cleaning on sheet metal and other hard surfaces only.
- Reversible air motor and variable speed control lets you effectively clean corners and delicate surfaces like duct board and duct liner. Air motor consumes up to 7 cfm of air.
- Guide system lets you center the brush in the ductwork from 3" to 11" off the bottom in 1" increments so you can position the brush for maximum cleaning effectiveness.
- Forward and reverse air washing tools attach quickly and easily to the extension rods so you can air wash and brush with one system..
- In addition to above items, the standard package includes 5 extension rods that lets you clean 23' each way from one access opening. Plus, an on/off trigger control and pressure regulator that connects to your air hose from your compressor.
- The new "Big Brush" kit that enables you to clean 20" to 30" ductworks includes (1) 32" nylon brush, (1) 32" silica carbide brush and (2) 13" to 15" guide legs.
- You can view the entire cleaning operation by adding the optional Super Inspector visual inspection system. This will further improve your cleaning productivity and quality!
- No other cleaning tool gives you so much cleaning capability in one system!

Specifications

Part No.	Description	Price
1-RBS02	Super RBS Rotary Brush & Air Wash System (1) 24" and (1) 12" nylon brush assembly (1) 24" and (1) 12" silica carbide brush assembly (1) Reversible air motor (1) Guide system (1) Multi-positional core (3) Sets of guide legs (3" to 5", 6" to 8", and 9" to 11") (1) 36" extension rod with couplers (4) 60" extension rod with couplers (1) Forward air sweep assembly (1) Reverse air sweep assembly (1) On/off control and pressure regulator (1) Carrying/storage case	Contact factory for current pricing
2-RBS40	Big Brush kit (1) 32" nylon brush assembly (1) 32" silica carbide brush assembly (2) 13" to 15" guide legs	

Add Super Inspector III system to the Super RBS system to view cleaning operation.

Accessories/Replacement Items

2-RCB05	12" (30.5 cm) nylon brush assembly
2-RCB06	12" (30.5 cm) silica carbide brush assembly
